COVID-19 IMPACT UPDATE

As COVID-19 continues to spread, CTPM is taking all possible precautions to ensure the health and safety of our clients and staff. **We're committed to maintaining all usual operations,** delivering essential services both at our Client and CTPM facilities.

Our staff is equipped with needed safety equipment when handling equipment both received at our facility and on-site at our client's facility. A process has been enacted to sanitize equipment prior to use while wearing gloves and other necessary equipment when practicable.

When preparing for on-site calibrations we encourage our clients to inform the CTPM scheduling department of any special requirements that our technicians will need to perform at the client facility. For on-site visits if our client has restricted access to their facility we recommend sending your equipment to our lab.

We're taking proactive safety measures, closely monitoring every new development, and adapting our response as required. Our top priority is protecting the health and well-being of our staff while ensuring our clients' operations continue as smoothly as possible during this difficult period.
